Engineering Noise Control Sep 27 2020 This classic and authoritative student textbook contains information that is not over simplified and can be used to solve the real world problems encountered by noise and vibration consultants as well as the more straightforward ones handled by engineers and occupational hygienists in industry. The book covers the fundamentals of acoustics, theoretical concepts and practical application of current noise control technology. It aims to be as comprehensive as possible while still covering important concepts in sufficient detail to engender a deep understanding of the foundations upon which noise control technology is built. Topics which are extensively developed or overhauled from the fourth edition include sound propagation outdoors, amplitude modulation, hearing protection, frequency analysis, muffling devices (including 4-pole analysis and self noise), sound transmission through partitions, finite element analysis, statistical energy analysis and transportation noise. For those who are already well versed in the art and science of noise control, the book will provide an extremely useful reference. A wide range of example problems that are linked to noise control practice are available on www.causalsystems.com for free download.

Handbook of Research on Mixed Methods Research in Information Science Oct 21 2022 Mixed methods research is becoming prevalent in many fields, yet little has been done to elevate mixed methods research in information science. A comprehensive picture of information science and its problems is needed to further understand and address the issues associated with it as well as how mixed methods research can be adapted and used. The Handbook of Research on Mixed Methods Research in Information Science discusses the quality of mixed methods studies and methodological transparency, sampling in mixed methods research, and the application of theory in mixed methods research throughout various contexts. Covering topics such as the issues and potential directions for further research in mixed methods, this comprehensive major reference work is ideal for researchers, policymakers, academicians, librarians, practitioners, instructors, and students.

Device Modeling for Analog and RF CMOS Circuit Design Feb 01 2021 Bridges the gap between device modelling and analog circuit design. Includes dedicated software enabling actual circuit design. Covers the three significant models: BSIM3, Model 9 &, and EKV. Presents practical guidance on device development and circuit implementation. The authors offer a combination of extensive academic and industrial experience.

Taking Aim Jan 24 2023 An acclaimed bow hunter who defies the stereotype that hunting is a man's game, Eva Shockey is at the forefront of a new wave of women and girls who are passionate about outdoor sports. Eva Shockey grew up expecting to be a dancer like her glamorous mother. But something about spending family vacations RV-ing across North America and going on hunts with her dad sparked in her an enduring passion for a different way of life. In Taking Aim, Eva tells a very personal story of choosing the less-traveled path to a rewarding life in outdoor pursuits like hunting and fishing. For her, as her millions of fans can attest, that has meant hunting as a way of harvesting food, caring deeply about conservation, sustainability and healthy eating, and getting closer to God in nature. In this riveting memoir for the adventurer in all of us, Eva takes readers along as

she hunts caribou on the rugged Aleutian Islands, tracks a 1,500-pound bull moose across the unforgiving Yukon, and meets many other challenges of a life in the wild. Along the way we learn that hunting is about so much more than pulling a trigger. "My story is about discovering your dream," writes Eva. "It's about following your passion, mastering your skills, taking aim no matter who thinks you're crazy...and then letting the arrow fly. If you've done all you can, I can tell you that you're almost certain to hit your mark." Whether you're a lifelong hunter or a city dweller who has never set foot in the wilderness, Eva's story delivers an empowering message about rejecting stereotypes and expectations, believing in yourself, and finding the courage to pursue what you care about most.

The Book of Ezekiel, Chapters 1-24 Jul 06 2021 To most modern readers the book of Ezekiel is a mystery. Few can handle Ezekiel's relentless denunciations, his unconventional antics, his repetitive style, and his bewildering array of topics. This excellent commentary by Daniel I. Block makes sense of this obscure and often misunderstood prophet and demonstrates the relevance of Ezekiel's message for the church today.

The Korowai of Irian Jaya Apr 15 2022 Irian Jaya is the official name of the western half of New Guinea, a province of Indonesia since the 1960s. Its inhabitants are generally untouched by civilization, and most of their hundreds of native languages and cultures remain unstudied. Van Enk and de Vries gained access to one of the most isolated parts of Irian Jaya in order to study the Korowai, a tribe in southern Irian Jaya. The Korowai still use stone tools, live in tree-houses, and have no knowledge of the outside world. Van Enk and de Vries provide the first study of the Korowai language and culture. They reproduce oral texts that show patterns of grammar, discourse, and culture, and discuss the phonological, morphological, and syntactical aspects of the language. In the process, van Enk and de Vries reveal a number of key semantic fields and conceptual patterns such as kinship, counting, the role of lunar phases, and Korowai cosmology.

Gorilla Society Nov 29 2020 Societies develop as a result of the interactions of individuals as they compete and cooperate with one another in the evolutionary struggle to survive and reproduce successfully. Gorilla society is arranged according to these different and sometimes conflicting evolutionary goals of the sexes. In seeking to understand why gorilla society exists as it does, Alexander H. Harcourt and Kelly J. Stewart bring together extensive data on wild gorillas, collected over decades by numerous researchers working in diverse habitats across Africa, to illustrate how the social system of gorillas has evolved and endured. *Gorilla Society* introduces recent theories explaining primate societies, describes gorilla life history, ecology, and social systems, and explores both sexes' evolutionary strategies of survival and reproduction. With a focus on the future, Harcourt and Stewart conclude with suggestions for future research and conservation. An exemplary work of socioecology from two of the world's best known gorilla biologists, *Gorilla Society* will be a landmark study on a par with the work of George Schaller—a synthesis of existing research on these remarkable animals and the societies in which they live.

Mental Toughness and Hardiness at Different Levels of Football. Sports Psychology and Coaching. May 24 2020 Now with the growth of commercialisation, football is a multi-billion pound business that competes for scarce resources and uses, amongst other things, professional management techniques. Because of the increase and push towards efficiency, it has become of greater interest to players, coaches, administrators, spectators and owners to identify psychological attributes and mental skills associated with superior sport performance as a primary stage of facilitating their development. However, there has been little research into the emotional factors affecting footballers at different levels, in particular, the mental toughness and hardiness of footballers. The aim of the present study was to investigate the relationship between mental toughness and hardiness of footballers and the level of football at which they perform. Mental toughness was assessed using the Psychological performance inventory. Hardiness was assessed using the Personal views survey III-R. Participants in the present study were 61 footballers from various clubs and 2 levels of performance: Playing recreational or elite football. Results are discussed relative to previous findings relevant to mental toughness and hardiness and future implications to aid the psychological development of footballers playing at different levels. Future research might concentrate further on psychological skills training, coping strategies and psychological preparation strategies in a wider variation of sports specific to a wider range of athletes, from grass roots to international level.

Airplane Flying Handbook (FAA-H-8083-3A) Mar 14 2022

How to Communicate in Business Dec 11 2021 A straightforward primer written specifically for engineers to help them effectively communicate with non-technical people in their businesses. Silk (Lancaster U., United Kingdom) introduces pertinent communication theories for planning business communication aims and structure. He also details specific strategies in spoken and written communication, presentations, and meetings. Annotation copyright by Book News, Inc., Portland, OR

Aim High, Achieve More Nov 10 2021 Two veterans of urban education provide a powerful model for urban school transformation based on a leadership approach consisting of affirmation, inspiration, and mediation (AIM). This practical guide includes examples of successful practices and activities to help your leadership team produce its own roadmap for change.

Cost-of-Capital in Managerial Finance Dec 19 2019 This book examines cost-of-capital models and their application in the context of managerial finance. This includes the use of hurdle rates in capital allocation decisions, as well as target returns in performance management. Besides a review of classical finance models such as the Capital Asset Pricing Model (CAPM), other contemporary models and techniques to determine the cost-of-capital of business units and private companies are discussed. Based on a mixed methods approach, current cost-of-capital practices and their determinants are empirically analyzed among German companies.

Modelling Flexible AC Transmission Systems (FACTS) Devices on Weak Transmission Lines in the Nigerian Power Network Feb 25 2023 Research Paper (postgraduate) from the year 2019 in the subject Electrotechnology, , language: English, abstract: The aim of the study is to model FACTS devices on weak transmission line in the Nigeria power network and consider their effect on the bus voltages, reactive and active power using genetic algorithm(GA) approach for loss minimization. The Nigeria 330KV

existing network to be considered consist of nine (9) generating stations, thirty(30) Buses and forty one (41) transmission lines which will be modelled and simulated using Matlab Version 7.10. The study is limited to Nigeria 330kV existing power network with the focus on the comparison of the Bus voltages and power flow on the transmission lines when FACTS devices are incorporated and when the FACTS devices are not incorporated.

Research Questions: For the realization of the objectives mentioned above and the aim, the following research questions were set as a guide: 1. What is the significant effect of FACTS devices on weak transmission lines? 2. Can FACTS device be used with genetic algorithm for optimization of power loss and improvement of the bus voltages? 3. What is the limitation of using just genetic algorithm without FACTS device for the optimization of power loss and the improvement of the bus voltages? This research work is divided into five chapters with each chapter buttressing more on minimization of power loss. The scope of the work , the objective and aim of the research work to be achieved is addressed in chapter one (1). Chapter two(2) focus on the literature review of other researchers on FACTS device in the improvement of the power network, the concept of FACTS device and the choice of FACTS device to be used was also addressed in chapter two (2) of this research work. Chapter three focus on the methodology used for this study. The simulation of the 330kV Nigeria power network was done on MATLAB /SIMULINK 7.5. Also the chapter three focused on the use of power flow analysis toolbox which is a collection of a written codes of m files that has a compatible interface with MATLAB to generate the load flow of the power network instead of using ETAP. The genetic algorithm was also discussed as an optimization tool deployed to optimize the losses on the transmission line. Chapter four focus on the research findings with possible explanation as to some of the result obtained. Finally chapter five talks about the conclusion of this research work and highlight some areas to explore in the future.

Essentials & Creating of IT Management Approach Mar 26 2023 The contents

Chapter 1 IT making strategy in the IT revolution times 7 1.1 The IT revolution and the management 1.1.1 The Internet and the business model patent 1.1.2 The Internet and the e-commerce of the pulse tile (EC) 1.1.3 IT management 13 1.2 The pot of the management information learning which is indispensable to IT engineer 17 1.2.1 Why do we fail in the implementation of IT system? 17 1.2.2 The basic concept in case of management for IT management 21 2.1 The business management technique utilization and IT management 25 2.1.1 The relation between the business activity process and the business management technique 25 2.1.2 The direction of the paradigm shift by the business activity 26 2.2 The practicing 4 corner viewpoint about IT management 30 2.2.1 It gets the object area and the aim of making IT. 30 2.2.2 The 4 corner viewpoint which explores the essence of IT 33 2.2.3 Focus to the cost. 37 2.2.4 We have a focus to the quality 39 2.2.5 We focus to the interface. 41 2.2.6 We focus to the speed. 43 Chapter3 The approach of the practice which leads IT management to the success by 7 steps 45 3.1 The 1st step 46 - The analysis evaluation of the inside and the external environment - 3.1.1The analysis evaluation of the business environment 46 The balanced scorecard 3.2 The 2nd step 50 - Business model design - 3.2.1 The business model design 50 3.2.2 4P&4C 53 3.2.3 E- market place 56 3.2.4 CRM 59 3.2.5 The benchmarking 62 3.3 The 3rd step 65 - Dater architecture design - 3.3.1 The dater architecture design 65 3.3.2 The data warehouse 67 3.3.3 XML 70 3.4 The 4th step 73 - Application architecture design -

decentralization of power type information utilization strategy of the clothes
manufacturer 172

Mental Health Care, Google eBook Jun 05 2021 A text written for non-specialist mental health nursing courses and suitable for undergraduate students from nursing and other health disciplines which is supported by integrated online resources. This is an adaptation of a Wiley Blackwell title by Harrison & Hart (editors), Mental Health Care for Nurses, designed to meet the needs of undergraduate students. Mental Health Nursing is generally a core second year subject and may be taken by nurses, paramedics, occupational therapists and other health disciplines. The focus is not on the 'general hospital', as many nurses and other health professionals in Australia will not necessarily be working in the hospital setting. It is important to consider the role of the 'multidisciplinary team'.

The Integrated Medical Curriculum Aug 27 2020 It is increasingly recognised that the medical education curriculum should re-integrate basic sciences and clinical disciplines.

This would enhance students' ability to integrate previous and future learning, link theory and professional standards to practice, and adapt to change.

Is Science Neurotic? May 16 2022 - Has dramatic implications for social science and the humanities, for philosophy and for education - Written in an informal, accessible form (with the exception of the appendix, which is more technical)

Reform Cinema in Iran Jul 26 2020 It is nearly impossible to separate contemporary Iranian cinema from the Islamic revolution that transformed film production in the country in the late 1970s. As the aims of the revolution shifted and hardened once Khomeini took power and as an eight-year war with Iraq dragged on, Iranian filmmakers confronted new restrictions. In the 1990s, however, the Reformist Movement, led by Mohammad Khatami, and the film industry, developed an unlikely partnership that moved audiences away from revolutionary ideas and toward a discourse of reform. In *Reform Cinema in Iran*, Blake Atwood examines how new industrial and aesthetic practices created a distinct cultural and political style in Iranian film between 1989 and 2007. Atwood analyzes a range of popular, art, and documentary films. He provides new readings of internationally recognized films such as Abbas Kiarostami's *Taste of Cherry* (1997) and Mohsen Makhmalbaf's *Time for Love* (1990), as well as those by Rakhshan Bani, Masud Kiami, and other key Iranian directors. At the same time, he also considers how filmmakers and the film industry were affected by larger political and religious trends that took shape during Mohammad Khatami's presidency (1997-2005). Atwood analyzes political speeches, religious sermons, and newspaper editorials and pays close attention to technological developments, particularly the rise of video, to determine their role in democratizing filmmaking and realizing the goals of political reform. He concludes with a look at the legacy of reform cinema, including films produced under Mahmoud Ahmadinejad, whose neoconservative discourse rejected the policies of reform that preceded him.

Munitions systems specialist (AFSC 46150). Apr 03 2021

School nutrition education programmes in the Pacific Islands: Scoping review and capacity needs assessment Oct 09 2021 The School Nutrition Education Programme (SNEP) is an intervention to educate school students on nutrition and food preparation with the aim of influencing healthy nutrition choice and practice at an age when life time behaviour habits are developing and in the wider community. FAO defines School Food Nutrition Education as consisting of coherent educational strategies and learning activities, with environmental supports, which help schoolchildren and their communities to achieve sustainable improvements in their diets and in food- and lifestyle-related behaviours, perceptions, skills and knowledge; and to build the capacity to change, to adapt to external change and to act as agents of change. This publication is the scoping study and capacity needs assessment and final report for the SNEP project.

Mind Time: How ten mindful minutes can enhance your work, health and happiness Jul 18 2022 IT TAKES JUST TEN MINUTES a day train your mind - you will feel more awake, more alive and more creative. Using these carefully researched exercises you can increase your attention span, realise your potential and use your mind to its full capacity. Yes, just ten...short ... minutes.

Taking Aim Dec 31 2020 Donovan does not say what he is up to these days, but over a decade ago he was doing HIV-prevention outreach with injection drug users, and wondered why the policymakers bemoaning the number of children with HIV restriction prevention among the very people who were parenting those children. He found that contradictions of

policy are usually intertwined with the complexities of representational government.

Teleology, First Principles, and Scientific Method in Aristotle's Biology Jun 24 2020
This volume presents an interconnected set of sixteen essays, four of which are previously unpublished, by Allan Gotthelf—one of the leading experts in the study of Aristotle's biological writings. Gotthelf addresses three main topics across Aristotle's three main biological treatises. Starting with his own ground-breaking study of Aristotle's natural teleology and its illuminating relationship with the *Generation of Animals*, Gotthelf proceeds to the axiomatic structure of biological explanation (and the first principles such explanation proceeds from) in the *Parts of Animals*. After an exploration of the implications of these two treatises for our understanding of Aristotle's metaphysics, Gotthelf examines important aspects of the method by which Aristotle organizes his data in the *History of Animals* to make possible such a systematic, explanatory study of animals, offering a new view of the place of classification in that enterprise. In a concluding section on 'Aristotle as Theoretical Biologist', Gotthelf explores the basis of Charles Darwin's great praise of Aristotle and, in the first printing of a lecture delivered worldwide, provides an overview of Aristotle as a philosophically-oriented scientist, and 'a proper verdict' on his greatness as scientist.

How to Do Your Research Project Mar 02 2021
Getting involved in medical and biomedical research through necessity or personal choice can be a testing experience. Each step of the process brings its own challenges, from liaising with supervisors, to the lack of opportunities to promote completed research. This brand new *How to* provides a complete guide to the process: from the planning stages, to execution, write-up, preparation for the viva examination, and how to maximise the impact of your research. It ensures you get the most out of the experience, both in terms of personal development and academic achievement, and even provides guidance on what to do when things don't quite go to plan. An ideal companion, written by an experienced postgraduate tutor, this concise and user-friendly manual is full of practical exercises, key points, and hints and tips, which will give you the edge when dealing with the more elusive realities of medical and healthcare research.

On War Jan 12 2022
Writing at the time of Napoleon's greatest campaigns, Prussian soldier and writer Carl von Clausewitz created this landmark treatise on the art of warfare, which presented war as part of a coherent system of political thought. In line with Napoleon's own military actions, he illustrated the need to annihilate the enemy and make a strong display of one's power in an 'absolute war' without compromise. But he was also careful to distinguish between war and politics, arguing that war could only be justified when debate was no longer adequate, and that if undertaken, its aim should ultimately be to improve the wellbeing of the nation.

Flourishing as the Aim of Education Dec 23 2022
This book develops a conception of student flourishing as the overarching aim of education. Taking as its basis the Aristotelian concept of eudaimonia, it provides a theoretical study of the foundations of flourishing that goes well beyond Aristotle's approach. *Flourishing as the Aim of Education* argues that the 'good life' of the student, to which education should contribute, must involve engagement with self-transcendent ideals and ignite awe-filled enchantment. It allows for social, individual and educational variance within the concept of flourishing, and it engages with a host of socio-political as well as 'spiritual' issues that are often overlooked in literature

discussing character education. Each chapter closes with food for thought for practitioners who can directly facilitate student flourishing. An outgrowth of the author's previous monograph *Aristotelian Character Education*, this book follows new directions in questioning how to educate young people towards a life of overall flourishing. It will be of great interest to researchers, academics and post-graduate students in the fields of character education, moral education and moral philosophy, as well as to educators and policy-makers.

Riddles of Existence: A Guided Tour of Metaphysics Jun 17 2022 The questions of metaphysics are among the deepest and most puzzling. What is time? Am I free in my actions? What makes me the same person I was as a child? Why is there something rather than nothing? *Riddles of Existence* makes metaphysics genuinely accessible, even fun. Its lively, informal style brings the riddles to life and shows how stimulating they can be to think about. No philosophical background is required to enjoy this book: anyone wanting to think about life's most profound questions will find *Riddles of Existence* provocative and entertaining.

Reconstructing Pragmatism Aug 07 2021 The figure of Richard Rorty stands in complex relation to the tradition of American pragmatism. On the one hand, his intellectual creativity, lively prose, and bridge-building fueled the contemporary resurgence of pragmatism. On the other, his polemical claims and selective interpretations function as a negative, fixed pole against which thinkers of all stripes define themselves. Virtually all pragmatists on the contemporary scene, whether classical or "new," Deweyan, Jamesian, or Peircean, use Rorty as a foil to justify their positions. The resulting internecine quarrels and divisions threaten to fragment and thwart the tradition's creative potential. More caricatured than understood, the specter of Rorty continues to block the road of inquiry and future development of pragmatism. *Reconstructing Pragmatism* moves beyond the Rortyan impasse by providing what has been missing for decades: a constructive, non-polemical account of Rorty's relation to classical pragmatism. The first book-length treatment of Rorty's intellectual debt to the early pragmatists, the volume establishes his selective appropriations not as misunderstandings or distortions but a sustained, intentional effort to reconstruct their thinking. Featuring chapters devoted to five key pragmatist thinkers--Charles Sanders Peirce, William James, John Dewey, Josiah Royce, and Jane Addams--the book draws on archival sources and the full scope of Rorty's writings to challenge prevailing misconceptions and caricatures. By elaborating Rorty's still largely untapped reconstructive resources, the book reveals limitations in predominant views of the classical pragmatists in current debates and opens up new modes of understanding pragmatism and why it matters today.

Intermediate Algebra: An Applied Approach Sep 08 2021 As in previous editions, the focus in *INTERMEDIATE ALGEBRA* remains on the Aufmann Interactive Method (AIM). Students are encouraged to be active participants in the classroom and in their own studies as they work through the How To examples and the paired Examples and You Try It problems. Student engagement is crucial to success. Presenting students with worked examples, and then providing them with the opportunity to immediately solve similar problems, helps them build their confidence and eventually master the concepts. Simplicity is key in the organization of this edition, as in all other editions. All lessons, exercise sets, tests, and supplements are organized around a carefully constructed hierarchy of objectives. Each exercise mirrors a preceding objective, which helps to reinforce key

concepts and promote skill building. This clear, objective-based approach allows students to organize their thoughts around the content, and supports instructors as they work to design syllabi, lesson plans, and other administrative documents. New features like Focus on Success, Apply the Concept, and Concept Check add an increased emphasis on study skills and conceptual understanding to strengthen the foundation of student success. The Ninth Edition also features a new design, enhancing the Aufmann Interactive Method and making the pages easier for both students and instructors to follow. Available with InfoTrac Student Collections <http://gocengage.com/infotrac>. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

Interprofessional Education and Collaboration Feb 13 2022 *Interprofessional Education and Collaboration: An Evidence-Based Approach to Optimizing Health Care* is a groundbreaking text in the field of interprofessional education (IPE) and interprofessional collaborative practice (IPCP). As the health care industry continues to grow, it is critical that those entering health care careers possess interprofessional competency and a collaborative skill set. As such, the World Health Organization and academic program accreditors have amplified their calls for interprofessional training. This text guides the reader through the core competencies for interprofessional collaborative practice that have been set by the Interprofessional Education Collaborative (IPEC) and takes an inclusive approach to the education standards set by professional programs that are members of the Health Professions Accreditors Collaborative (HPAC), including the Commission on Accreditation of the Athletic Training Education (CAATE). Authored by a team of experts representing seven health care professions, this text uses simple definitions and uniform terminology to supply a foundational basis for IPE and IPCP. Introductory topics include building professional knowledge of self and others, creating a culture for teams, building interprofessional relationships, and fostering collaboration. Later chapters move beyond the basics to provide guidance in leading interprofessional teams, managing conflict, and sustaining the interprofessional effort. *Interprofessional Education and Collaboration* offers a unique pedagogical structure that links IPE concepts with IPCP strategies by connecting research with evidence-based practices. Case studies create opportunities to assimilate and discuss IPE concepts. To optimize student engagement and comprehension, each chapter contains the following valuable learning aids: Each chapter begins with a Case Study that presents a realistic IPCP scenario. At the close of each chapter, the case study is revisited to apply the chapter themes to the case study, and three to five discussion questions are supplied. Collaborative Corner sidebars aid comprehension with reflective questions or statements related to chapter topics. This feature will facilitate collaborative learning as students share their interprofessional perspectives. Tools of IPE sidebars equip readers with resources such as surveys, inventories, and activities to implement in their daily practice. EBP of Teamship sidebars showcase contemporary research articles and findings. This feature reinforces the connection between IPE and IPCP by summarizing relevant research and supplying corresponding evidence-based IPCP strategies. As leading health care institutions continue to prioritize IPE and IPCP, educators have a responsibility to shape the future of health care through an interprofessional curriculum. *Interprofessional Education and Collaboration* is focused on developing a dual identity that leads to intentional behaviors designed to improve patient outcomes through IPCP. Readers will conclude this text with a firm understanding of IPE concepts and IPCP

implementation strategies that aim to create change in daily practice and improve the impact of health care.

FAR/AIM. Apr 27 2023

Thinking Through Technology Feb 19 2020 This introduction to the philosophy of technology discusses its sources and uses. Tracing the changing meaning of "technology" from ancient times to the modern day, it identifies two important traditions of critical analysis of technology: the engineering approach and the humanities approach.

The Elements of General Method Oct 29 2020

Fundamentals of Algebraic Specification 2 Sep 20 2022 Since the early seventies concepts of specification have become central in the whole area of computer science. Especially algebraic specification techniques for abstract data types and software systems have gained considerable importance in recent years. They have not only played a central role in the theory of data type specification, but meanwhile have had a remarkable influence on programming language design, system architectures, and software tools and environments. The fundamentals of algebraic specification lay a basis for teaching, research, and development in all those fields of computer science where algebraic techniques are the subject or are used with advantage on a conceptual level. Such a basis, however, we do not regard to be a synopsis of all the different approaches and achievements but rather a consistently developed theory. Such a theory should mainly emphasize elaboration of basic concepts from one point of view and, in a rigorous way, reach the state of the art in the field. We understand fundamentals in this context as: 1. Fundamentals in the sense of a carefully motivated introduction to algebraic specification, which is understandable for computer scientists and mathematicians. 2. Fundamentals in the sense of mathematical theories which are the basis for precise definitions, constructions, results, and correctness proofs. 3. Fundamentals in the sense of concepts from computer science, which are introduced on a conceptual level and formalized in mathematical terms.

Revelation's Hymns Jan 20 2020 Revelation's Hymns examines the hymnic pericopes in Revelation in light of the cosmic conflict theme. It considers this theme as integral to the development of Revelation's plot. Recognizing that critical studies give interpretative primacy to the political realities that existed at the time of Revelation's composition, Grabiner responds to the need for an examination of the storyline from the perspective of issues that are of narrative importance. Grabiner argues that the cosmic conflict is at the centre of the book's concerns, and attempts to determine the function of the hymns with respect to this. Previous examinations of the hymns have considered them as a response and/or parody to Roman liturgy, examples of God's unquestioned sovereignty, or expressions of thematic overtones found throughout the book. While these approaches make a contribution to a greater understanding of the hymns, the relation to the ever-present conflict theme has not been explored. This study allows the hymnic sections to engage with the larger narrative issue as to who is truly the rightful sovereign of the universe.
