Join us for a classic Professor Challenger Adventure, from the celebrated author of the "Sherlock Holmes" series. This is a sequel to "The Lost World." An English scientist, with an interest in nature, discovers that the Earth is about to pass through a cloud of poisonous gas that may well wipe out all of humanity. Challenger and his companions create a sealed room, with several hours of air, to attempt to survive certain disaster. This novel is considered to be among the 100 greatest books of all time. By the end of that summer, two people would be dead... Fans of *In A Dark Dark Wood* and *The Couple Next Door* will love this twisty thriller. I have given up so much and done so many terrible things already for the sake of my family that I can only keep going. I do not know what is going to happen to us. I am frightened, but I feel strong. I have the strength of a woman who has everything to lose. In the sweltering summer of 1997, strait-laced, straight-A student Karen met Biba - a bohemian and impossibly glamorous aspiring actress. She was quickly drawn into Biba's world, and for a while life was one long summer of love. But every summer must end. By the end of theirs, two people were dead - and now Karen's past has come back to haunt her . . . **STONE MOTHERS**, the new novel by Erin Kelly, is available to buy now! To give an exact and particular Account of the Nature and Manner of acting of Poisons, is no easie Matter; but to Discourse more intelligibly of Them than Authors have hitherto done, not very difficult. One may without much Pains shew their Effects to be owing to something more than the bare Qualities of Heat or Cold; and Discover the Footsteps of Mechanism in those surprizing Phaenomena which are commonly ascribed

to some Occult or Unknown Principle. But to Unravel the Springs of the several Motions upon which such Appearances do depend, and Trace up all the Symptoms to their First Causes, requires some Art as well as Labour; and that both upon the account of the Exquisite Fineness, and marvellous Composition, of the Animal Machine in which they are Transacted, and of the Minuteness of those Bodies which have the force to induce in it such Sudden and Violent Alterations." When 18-year-old Richard Jahnke killed his father with several blasts from a 12-gauge shotgun, it was the last act in a years-long family tragedy. Jahnke's murder trial brought to light a sordid story of an abusive father--and a nightmare tale of a family living in terror behind the quiet facade of their suburban home. Mrs. North must protect her aunt from being poisoned—whether she likes it or not Pamela North has never worried about making sense. When she has a thought, she expresses it, and if no one in the room knows what she's talking about, it's no trouble to her. While Mrs. North's unique style of thought can make her a challenging conversational partner, it also makes her one of the finest amateur sleuths in New York City. But no matter how sharp her wit, she can't pin down Aunt Flora. An indomitable old woman, shaped like a snowman and just as icy, Flora is convinced that someone is trying to slip her arsenic, and she'll be very cross if her niece can't stop the culprit before he succeeds. Aunt Flora stubbornly refuses to let Pamela call in the police, until a suspicious dead body forces them to ask the opinion of Lt. William Weigand. It's a screwy mystery, and that means it's perfect for Mrs. North. Hanged for a Sheep is the 5th book in the Mr. and Mrs. North Mysteries, but you may enjoy reading the series in any order. The 18th century was a wealth of knowledge, exploration and rapidly growing technology and expanding record-keeping made possible by advances in the printing press. In its determination to preserve the century of revolution, Gale initiated a revolution of its own: digitization of epic proportions to preserve these invaluable works in the largest archive of its kind. Now for the first time these high-quality digital copies of original 18th century manuscripts are available in print, making them highly accessible to libraries, undergraduate students, and independent scholars. Medical theory and practice of the 1700s developed rapidly, as is evidenced by the extensive collection, which includes descriptions of diseases, their conditions, and treatments. Books on science and technology, agriculture, military technology, natural philosophy, even cookbooks, are all contained here. ++++ The below data was compiled from various identification fields in the bibliographic record of this title. M. for Ralph Smith, 1708. [16],189, [3]p., plate; 8° The story of an infamous poison that left toxic bodies and decimated wildlife in its wake is also a cautionary tale about how corporations stoke the flames of science denialism for profit. The chemical compound DDT first earned fame during World War II by wiping out insects that caused disease and boosting Allied forces to victory. Americans granted it a hero's homecoming, spraying it on everything from crops and livestock to cupboards and curtains. Then, in 1972, it was banned in the US. But decades after that, a cry arose to demand its return. This is the sweeping narrative of generations of Americans who struggled to make sense of the notorious chemical's risks and benefits. Historian Elena Conis follows DDT from postwar farms, factories, and suburban enclaves to the floors of Congress and tony social clubs, where industry barons met with Madison Avenue brain trusts to figure out how to sell the idea that a little poison in our food and bodies was nothing to worry about. In an age of spreading misinformation on issues including pesticides, vaccines, and climate change, Conis shows that we need new ways of communicating about science—as a constantly evolving discipline, not an immutable collection of facts—before it's too late. A group of friends must deal with betrayal, lust and lies in the heart-wrenching sequel to A Sense of Guilt What can you do once the worst has already happened? The central characters of A Sense of Guilt – which became a hugely successful television series – are facing the devastating effects of Felix's affair with Sally, the teenage stepdaughter of his best friend, Richard. Elizabeth and Felix's marriage has been tested to its limits: Richard's marriage to Helen, Sally's mother, has collapsed and Richard has returned to his first wife, Inge. 'Elizabeth managed to walk to the door but she still couldn't look at Felix. Were there no limits to what she was asked to endure or had she just reached the end?' 'Inge sat down again at the kitchen table, thinking that a miracle had happened and she did not know how to behave. When you get your heart's desire, what do you do to celebrate?' 'Had Helen taken Richard for granted all those years? She hadn't been aware of it and yet now he had gone the pain was so sharp that she didn't know how to bear it.' They will find the answers they seek... but at what cost? A Gift of Poison is a superb emotional drama – tense, perceptive and compelling – and not to be missed by readers of Peter Swanson and Liane Moriarty. At a swanky rooftop restaurant in New York, a pair of husband-and-wife sleuths must find out who spiked a woman's drink with murder . . . There's a stunning view from the top of the Ritz-Plaza Hotel, but it pales in comparison to Lois Winston's beauty. She arrives on the arm of David McIntosh—an agreeable young man who would marry her if she gave him the chance—to take in the scenery, eat a light supper, and forget the busy world below. Lois's first cocktail lifts her spirits, helping her dispel the strange sadness that tugs at her soul. But her second drink isn't so kind. Lois isn't halfway done with her Cuba libre when her cheeks grow hot, her breath becomes short, and she falls dead to the floor. Solving the case of this terribly fashionable murder falls to New York Police Department's Lt. William Weigand, who tackles the investigation with the help of his friends, Jerry and Pamela North. The effervescent couple will catch the killer between cocktails—unless the poisoner targets their glasses next. "[An] excellent series." —The New Yorker "Pam is always amusing." —The New York Times For centuries, arsenic's image as a poison has been inextricably tied to images of foul play. In King of Poisons, John Parascandola examines the surprising history of this deadly element. From Gustave Flaubert to Dorothy Sayers, arsenic has long held a place in the literary realm as an instrument of murder and suicide. It was delightfully used as a source of comedy in the famous play Arsenic and Old Lace. But as Parascandola shows, arsenic has had a number of surprising real-world applications. It was frequently found in such common items as wallpaper, paint, cosmetics, and even candy, and its use in medical treatments was widespread. American ambassador Clare Boothe Luce suffered from exposure to arsenical paint in her study, and Napoleon's death has long been speculated to be the result of accidental or intentional poisoning. But arsenic poisoning is still a public menace. In the neighborhood surrounding American University in Washington, D.C., the army has undertaken a massive cleanup of artillery shells and bottles containing chemical warfare agents such as arsenical lewisite after a number of workmen and residents became ill. Arsenic contamination of the water supply in Bangladesh and in West Bengal, India, is a major public health problem today as well. From murder to crime fiction, from industrial toxin to chemical warfare, arsenic remains a powerful force in modern life. In this shocking and sobering book, two fearless journalists directly and definitively link industrial toxins to the current rise in childhood disease and death. In the tradition of Silent Spring, Poisoned Profits is a landmark investigation, an eye-opening account of a country that prizes money over children's health. With indisputable data, Philip Shabecoff and Alice Shabecoff reveal that the children of baby boomers—the first to be raised in a truly "toxified" world—have higher rates of birth defects, asthma, cancer, autism, and other serious illnesses than previous generations. In piercing case histories, the authors identify the culprit as corporate pollution. Here are the stories of such places as Dickson, Tennessee, where babies were born with cleft lips and palates after landfill chemicals seeped into the water, and Port Neches, Texas, where so many graduates of a high school near synthetic rubber and chemical plants contracted cancer that the school was nicknamed "Leukemia High." The danger to our children isn't just in the outside world, though. The Shabecoffs provide evidence that our homes are now infested with everything from dangerous flame retardants in crib mattresses to harmful plastic softeners in teething rings to antibiotics and arsenic in chicken—additives that are absorbed by growing and physically vulnerable kids as well as by pregnant women. Compounding the problem are chemical corporations that sabotage investigations and regulations, a government that refuses to

police these companies, and corporate-hired scientists who keep pertinent secrets massaged with skewed data of their own. Poisoned Profits also demonstrates how people are fighting back, whether through grassroots parents' groups putting pressure on politicians, the rise of "ecotheology" in the pulpits of formerly indifferent churches, or the new "green chemistry" being practiced in labs to replace bad elements with good. The Shabecoffs also include helpful tips on reducing risks to children in how they eat and play, and in how parents clean and maintain their homes. Powerful, unflinching, and eminently readable, Poisoned Profits is a wake-up call that is bound to inspire talk and force change. Brindley, bookseller to His Royal Highness the Prince of Wales, at the Feathers in New-Bond-Street., 1745 Medicine; Poisons; Toxicology Edgar Award Finalist: The shocking account of a Wyoming father who terrorized his family for years—until his children plotted a deadly solution. One cold November night, in Cheyenne, Wyoming, fifteen-year-old Richard Jahnke Jr., ROTC leader and former Boy Scout, waited for his parents to return from celebrating the twentieth anniversary of the night they met. When his father got out of the car, the boy blasted him through the heart with a twelve-gauge pump-action shotgun. Richard's seventeen-year-old sister, Deborah, was sitting on the living room couch with a high-powered rifle—just in case her brother missed. Hours later the Jahnke kids were behind bars. Days later they made headlines. So did the truth about the house of horrors on Cowpoke Road. Was it cold-blooded murder? Or self-defense? Richard Jahnke Sr., special agent for the IRS, gun collector, and avid reader of Soldier of Fortune, had been subjecting his wife, Maria, and both children to harrowing abuse—physical, psychological, and sexual—for years. Deborah and her brother conspired to finally put a stop to it themselves. But their fate was in the hands of a prejudiced and inept judicial system, and only public outcry could save them. Written with the full and revealing cooperation of the Jahnkes, this finalist for the Edgar Award for Best Fact Crime is "the ultimate family nightmare, played out in the heartland of America. . . . From the night of the murder through both trials, convictions and both youngsters' eventual release . . . it's gripping reading" (Chicago Tribune). Discusses types of poisoning and people who have used poison to commit murder. 'It's the last day of the holidays and Spencer Kelly (12) wants to hold Hazel Burns (12) by the hand. This is the meaning of life. He wants to sit beside her on a sand dune and hold her hand and then kiss her. Just kissing, in a nice way, on her cheek perhaps and then a little bit at the top of her arms- If he can kiss her this once then he'll always have kissed her, and everything which follows will be different. It's to be the one moment which instantly changes everything.' For more than a quarter century, Sittig's Handbook of Toxic and Hazardous Chemicals and Carcinogens has proven to be among the most reliable,

easy-to-use and essential reference works on hazardous materials. Sittig's 5th Edition remains the lone comprehensive work providing a vast array of critical information on the 2,100 most heavily used, transported, and regulated chemical substances of both occupational and environmental concern. Information is the most vital resource anyone can have when dealing with potential hazardous substance accidents or acts of terror. Sittig's provides extensive data for each of the 2,100 chemicals in a uniform format, enabling fast and accurate decisions in any situation. The chemicals are presented alphabetically and classified as a carcinogen, hazardous substance, hazardous waste, or toxic pollutant. This new edition contains extensively expanded information in all 28 fields for each chemical (see table of contents) and has been updated to keep pace with world events. Chemicals classified as WMD have been included in the new edition as has more information frequently queried by first responders and frontline industrial safety personnel. *Includes and references European chemical identifiers and regulations. *The only single source reference that provides such in-depth information for each chemical. *The two volume set is designed for fast and accurate decision making in any situation. [8],109, [3]p., plate; 8° Agatha Christie and the Guilty Pleasure of Poison examines Christie's female poisoners in the context of Christie's own experience in pharmacy and of detective fiction. In doing so, it uncovers an overlooked dynamic in which female poisoners deliver well-deserved comeuppance for gendered and classed wrongdoing ordinarily accepted in everyday life. While critics have long recognized male outlaws, like Robin Hood, who use crime to oppose a corrupt system, this book contends that female outlaws – witches and poisoners – offer a similar heritage of empowered femininity. Far from cozy and formulaic, Agatha Christie's outlaw poisoners offer readers the surprising pleasures of comeuppance, and they set the stage for contemporary detective fiction writers, more recent films depicting poisoning as empowering, and even poison gardens, which are tourist destinations that offer visitors the guilty pleasure of poison.
