This publication is a faithful reproduction of the 1962-1965 BSA Factory Workshop Manual part number 00-4113 that covers the A50 (500cc) and A65 (650cc) unit-construction twins manufactured between August 1961 through the end of July 1965. It should be noted that BSA model years ran from August through July. For example, the 1962 models were released in August 1961, the 1963 models in August 1962 etc. This can, at times, cause confusion and the only sure method of determining 'what year is it?' is by the serial number. The various engine and frame numbers for the 1962 to 1965 unit-construction twins are shown in the table below. Note that the pre-1966 engine and frame numbers seldom matched. MODEL KEY: C = Cyclone, CC = Cyclone Competition, L = Lightning, LC = Lightning Clubman, LR = Lightning Rocket, R = Rocket, S = Star, SH = Spitfire Hornet, TR = Thunderbolt Rocket. EXTENSION (-) KEY: CB = Cable (Rear) Brake, CR = Close Ratio Gearbox, PM = Police Model, RB = Rod (Rear) Brake, RC = Rev Counter, UK = United Kingdom Model, US = USA Model. 1962 Engine/Frame A50S-CB A50-101/A50-101 A50S-RB A50-101/A50A-101 A65S-CB A65-101/A50-101 A65S-RB A65-101/A50A-101 1963 Engine/Frame A50S-CB A50-823/A50-2288 A50S-RB A50-823/A50-2701 A65S-CB A65-1947/A50-2288 A65S-RB A65-1947/A50-2701 1964 Engine/Frame A50S A50A-101/A50-5501 A50-PM A50AP-101/A50-5501 A50C-US A50B-101/A50B-101 A50C-CR A50B-C101/A50B-101 A65S A65A-101/A50-5501 A65-PM A65AP-101/A50-5501 A65R A65B-101/A50B-101 A65R-RC A65C-101/A50-5501 A65TR A65B-101/A50-5501 A65LR A65D-101/A50B-101 A65SH A65E-101/A50B-101 1965 Engine/Frame A50S A50A-686/A50-8437 A50-PM A50AP-121/A50-8437 A50C-US A50D-101/A50B-4001 A50CC-US A50B-507/A50B-4001 A50C-UK A50DC-101/A50B-4001 A50CC-UK A50DC-101/A50B-4001 A65S Each Clymer manual provides specific and detailed instructions for performing everything from basic maintenance and troubleshooting, to a complete overhaul of your vehicle. KX60 (1983-2002), KX80 (1983-1990) The goal of this book is to gain a clear picture of the current status and future challenges with regard to the digitalization of the supply chain – from the perspective of the suppliers, the manufacturers, and the customers. They were the target groups of the book. Digitization has touched upon all aspects of businesses, including supply chains. Technologies such as RFID, GPS, and sensors have enabled organizations to transform their existing hybrid (combination of paper-based and IT-supported processes) supply chain structures into more flexible, open, agile, and collaborative digital models. Unlike hybrid supply chain models, which have resulted in rigid organizational structures, unobtainable data, and disjointed relationships with partners, digital supply chains enable business process automation, organizational flexibility, and digital management of corporate assets. In order to reap maximum benefits from digital supply chain models, it is important that companies internalize it as an integral part of the overall business model and organizational structure. Localized disconnected projects and silo-based operations pose a serious threat to competitiveness in an increasingly digital world. The technologies discussed in this text – artificial intelligence, 3D printing, Internet of things, etc. – are beginning to come together to help digitize, automate, integrate, and improve the global supply chains. It's certainly an exciting and challenging time for both new supply chain professionals and long-time supply chain professionals. Ducati stunned the world in 1988 when the struggling, small Italian firm unleashed its Desmoquattro -- 8-valve, desmodromic -- Superbike. The bike found success on the world's racetracks right from the start. Road-going versions soon carried that success to the general public, proving this design wasn't just another noisy prototype. The Superbikes -- 748, 851, 888, 916, and 996 -- are now

Ducati's best-selling machines in the United States; and the Desmoquattro engine found its way into the company's more pedestrian series such as the Monster roadster and ST4 sport-tour. This is the comprehensive volume on Ducati's ultimate performance motorcycles and replaces the out-of-print Ducati Super Bikes: 851, 888, 916. Owners of Norton Commando motorcycles are subjected to considerable confusion surrounding the selection of an appropriate workshop manual from the multitude of originals and reprints that have recently flooded the on-line marketplace. Many of the reprints found on internet websites are from 'bedroom sellers' at enticingly low prices by individuals that really have no idea what they are selling. Many are nothing more than poor quality comb-bound photocopies that are scanned and printed complete with greasy pages and thumbprints and, as such, are deceptively described as 'pre-owned'. In addition, they are often advertised for the incorrect series and/or model years of motorcycles. The Norton Commando model range is especially subjected to incorrect identification by these 'bedroom sellers' and you are encouraged to read the paragraph below to help identify the correct manual for your model. During the 1968 to 1978 Commando model run there were 4 different manuals published by the factory: The original 52 page 750cc manual (part number 06-3062) is applicable to the 1968 to 1970 models ONLY that were fitted with the external rev-counter drive and/or the Atlas style exhaust (refer to ISBN 9781588502421). This original manual was followed by part number 06-3419 which covers the 1970 to 1973 750cc models ONLY. The next, and most comprehensive manual, part number 06-5146, was published in 1973 and the 850cc data was added making this manual applicable to the entire range of 750cc & 850cc models from 1970 to 1975. Finally, with the introduction of the electric start, left side gear change, rear disc brake Mark 3 models in 1975, a separate manual part number 00-4224 was published which is specific to the 1975 to 1978 MKIII 850cc series from engine no. 325001 & frame no. F125001. We are pleased to offer this reproduction of the Factory Workshop Manual 06-5146 to owners of the 1970 through 1975 models and we hope that the explanation above removes any doubt regarding which manual is correct for a particular series of Norton Commando model. Models and model years covered in this manual are: Interstate: 745cc 1972-1973 & 828cc 1973-1975 Roadster: 745cc 1970-1973 & 828cc 1973-1975 Hi-rider: 745cc 1971-1973 & 828cc 1973-1975 Interpol: 745cc 1970-1973 & 828cc 1973-1975 Fastback: 745cc 1970-1973 Fastback LR (Long Range): 745cc 1971-1972 S Type: (Scrambler) 745cc 1970 SS Type (Street Scrambler): 745cc 1970-1971 IMPORTANT: Owners of 1968-1970 750cc Commando models are directed to our workshop manual ISBN 9781588502421 and owners of the later MKIII models would require our 1975-1978 manual ISBN 9781588502445.
