Research Paper (postgraduate) from the year 2017 in the subject Business economics - Marketing, Corporate Communication, CRM, Market Research, Social Media, grade: A, , language: English, abstract: Online shopping is having very bright future. Perception towards online shopping is getting better in India. With the use of internet, consumers can shop anywhere, anything and anytime with easy and safe payment options. Consumers can do comparison shopping between products, as well as, online stores. In present scenario customers are busy that they don't have enough chance and time to go to shopping centers and purchase the things they need, everybody likes to do online shopping. In online, Product assortment is very huge to choose, and make immediate comparison in price, quality, variety, colour and also get product based

information like customer feedback. The main purpose of this paper is to determine the "Factors Influencing Consumer Perception towards Online Shopping". The objective for this research is to know the customer perception and identify the factors which influence the online customer's. A quantitative research design which is descriptive and exploratory in nature was selected to gain insights about customer perception towards online shopping. The questionnaire prepared by using Likert's five-point scale ranging from (1-5) where 1 Means 'not at all important and 5 Means 'most important '.The research has taken use of closed ended questions. The data collection was done over a period of 8 weeks this was done by going directly to the respondents or through mails. A total number of respondents taken for this study are 154. The collected data is analyzed in statistical method of factor analysis in the IBM SPSS 20.0 software. The data collected on 30 variables was deducted into five factors in the software and analyzed accordingly. The survey revealed that different customers have different perception towards online shopping; most of them having a very good attitude towards online shopping but there are certain customer who still find difficulties or we can say apart from several benefits has some disadvantage in mind of customer. Customer perception keeps on changing with time to time which is to be taken in the consideration. The most important factors that can be taken into account to understand the Internet shopping (Customer Service, Convenience, Experience, Value added service and Product related information).

The banking system and financial transactions have taken paradigm shift in recent decade in India. The present era has entered into smartphone to smart wallet and they have become mainstream mode of online payment. Mobile users use digital payment gateway and e-commerce applications to facilitate financial transactions to online retailers and e-businesses. Demonetization has also envisaged progressive shift to cashless economy. The study was conducted to find out the dimensions and impact of various demographic factors on the usage of payment banks in the Ahmedabad district of Gujarat. The payment banks show a rapid growth and identified dimensions for the usage of payment banks are; user friendly, convenience, cost effectiveness, security and easy cash management. People look for the aforesaid factors while they transact through payment banks. It is observed that most of the people use Paytm, Freecharge and Jio money payment banks to transact and awareness has impact on the usability of payment banks for bill payment, recharge, ticket booking and shopping. Considering the demographic factors and its impact on the occupation, annual income and education on the usage of payment banks whereas age and annual income both impact the frequency of usage and average spending through payment banks. Private online digital currency systems offer people accessible, convenient, and inexpensive everyday financial tools outside of traditional bank-owned and operated platforms. Digital currency systems facilitate local and international fund transfers, online and offline payments, and simple cash-to-digital everyday financial products without the need for a conventional bank account of any retail bank product. Over the past several years, Bitcoin has grown into an efficient person-to-person and person-to-business payment system without the backing of any bank or financial institution. This phenomenon is producing a new level of an on- and offline commerce and a society much more attuned to digital currency systems. The Digital Currency

Challenge details how new 2007-2008 U.S. legal issues surrounding digital currency products forced companies from the U.S. market and caused the Treasury Department to enact stricter regulations. Mullan profiles new and innovative present day digital currency systems, such as Bitcoin, and illustrates how software designers and monetary theorists use new technology to circumvent current U.S. regulations. This work also explains how new digital currency systems are not just software products, but tools providing financial freedom to people in countries all around the world.

Choosing an Online Payment System: Google Checkout vs. PayPal is a digital short cut that covers Google's new Google Checkout online payment system. It covers all aspects of using Google Checkout, for both buyers and sellers, and then compares and contrasts Google Checkout with PayPal, the current market-leader in online payments. You will learn which of the two payment systems, Google Checkout or PayPal, should be used, when given a choice. Sellers will learn which payment system is best to use for their online auctions and merchant websites.

Table of Contents

1. **Buying and Selling Electronically: How Online Payment Systems Work:** A general discussion on how PayPal, Google Checkout, and similar online payment systems work
2. **Using Google Checkout: For Buyers:** A detailed discussion on how to use Google Checkout to purchase items online
3. **Using PayPal: For Buyers:** A detailed discussion on how to use PayPal to purchase items online
4. **Buyer's Choice: Google Checkout or PayPal?:** A comparison of Google Checkout with PayPal for online purchasers; also covers other payment systems an online shopper might encounter
5. **Using Google Checkout: For Sellers:** A detailed discussion on how to add Google Checkout to your merchant website and use the service to manage customer payments
6. **Using PayPal: For Sellers:** A detailed discussion on how to add PayPal to your merchant website and eBay

auctions and use the service to manage customer payments 7. Seller's Choice: Google Checkout or PayPal?: A comparison of Google Checkout with PayPal for online sellers; also covers other alternatives, such as Amazon Payments. In the first Russian textbook on electronic payments Dmitry Artimovich summarized his ten-year experience in the field. Online Payment Solutions uncovers the nuances of acquiring and analyzes in detail the rules of Visa and MasterCard payment systems. This book is conceived as a tutorial for people professionally working in the field of Internet acquiring, experts in online trade, as well as for the general public interested in the topic of electronic payments. The textbook focuses on the emergence of international payment systems and the reasons that put them on that particular path of development. Each chapter is supplemented with questions for self-control, allowing the reader to use it as a textbook. In addition, the author attempts to reveal the weaknesses and peculiarities of the development of payment card payment systems in Eastern Europe, as well as the imperfections of the Russian and European legislation. The book contains an extensive comparison of the implementation of payment system rules in different countries. This simple bill payment log book. Easy to use and everything on one page. In 2011 the World Bank—with funding from the Bill and Melinda Gates Foundation—launched the Global Findex database, the world's most comprehensive data set on how adults save, borrow, make payments, and manage risk. Drawing on survey data collected in collaboration with Gallup, Inc., the Global Findex database covers more than 140 economies around the world. The initial survey round was followed by a second one in 2014 and by a third in 2017. Compiled using nationally representative surveys of more than 150,000 adults age 15 and above in over 140 economies, *The Global Findex Database 2017: Measuring Financial Inclusion and the Fintech Revolution* includes updated indicators on access to and use of formal and informal financial services. It has additional data on the use of financial technology (or fintech), including the use of mobile phones and the Internet to conduct financial transactions. The data reveal opportunities to expand access to financial services among people who do not have an account—the unbanked—as well as to promote greater use of digital financial services among those who do have an account. The Global Findex database has become a mainstay of global efforts to promote financial inclusion. In addition to being widely cited by scholars and development practitioners, Global Findex data are used to track progress toward the World Bank goal of Universal Financial Access by 2020 and the United Nations Sustainable Development Goals. The database, the full text of the report, and the underlying country-level data for all figures—along with the questionnaire, the survey methodology, and other relevant materials—are available at www.worldbank.org/globalfindex. This is the eBook version of the printed book.

Choosing an Online Payment System: Google Checkout vs. PayPal is a digital short cut that covers Google's new Google Checkout online payment system. It covers all aspects of using Google Checkout, for both buyers and sellers, and then compares and contrasts Google Checkout with PayPal, the current market-leader in online payments. You will learn which of the two payment systems, Google Checkout or PayPal, should be used, when given a choice. Sellers will learn which payment system is best to use for their online auctions and merchant websites.
