We Bled Together Apr 15 2022 There is no crime in detecting and destroying in wartime the spy and informer...I have paid them

back in their own coin. - Michael CollinsMichael Collins' development of a formidable intelligence network transformed, for the first time in history, the military fortunes of the Irish against the British. The Dublin Brigade of the IRA was pivotal to this defining strategy. In 1919, Collins formed members of the brigade into two Special Duties Units. They eventually joined to form his 'Squad' of assassins tasked

with immobilising British intelligence. Eyewitness testimonies and war diaries lend immediacy and insight to this thrilling account of the daring espionage and killings carried out by both sides on Dublin's streets. Dominic Price reveals how the IRA developed Improved Explosive Devices, and experimented with chemical weapons in the form of poison gas and infecting water supplies. When the Civil War erupted,

the devotion of a significant cohort of the Dublin Brigade to Collins, forged during the darkest of days, was unbreakable. Many of them, identified here for the first time, formed the backbone of the Free State in key intelligence and military roles. While not shying away from the revulsions of the Civil War, neither does Price abandon the brigade's story at its conclusion. As well as revealing the disenchantment of some, who took part in the 1924 army mutiny, he exposes the personal horrors that awaited in peacetime, when psychological trauma was common. This is the stirring and

poignant story of the human endeavour and suffering at the core of the Dublin Brigade's fight for Irish freedom. [African linguistics on the prairie](#) Oct 09 2021 African Linguistics on the Prairie features select revised peer-reviewed papers from the 45th Annual Conference on African Linguistics, held at the University of Kansas. The articles in this volume reflect the enormous diversity of African languages, as they focus on languages from all of the major African language phyla. The articles here also reflect the many different research perspectives that frame the work of

linguists in the Association for Contemporary African Linguistics. The diversity of views presented in this volume are thus indicative of the vitality of current African linguistics research. The work presented in this volume represents both descriptive and theoretical methodologies and covers fields ranging from phonetics, phonology, morphology, typology, syntax, and semantics to sociolinguistics, discourse analysis, language acquisition, computational linguistics and beyond. The Auditory Culture Reader

Aug 19 2022 The first edition of *The Auditory Culture Reader* offered an introduction to both classical and recent work on auditory culture, laying the foundations for new academic research in sound studies.

Today, interest and research on sound thrives across disciplines such as music, anthropology, geography, sociology and cultural studies as well as within the new interdisciplinary sphere of sound studies itself. This

second edition reflects on the changes to the field since the first edition and offers a vast amount of new content, a user-friendly organization which highlights key themes and concepts, and a methodologies section which addresses practical questions for students setting out on auditory explorations. All essays are accessible to non-experts and encompass scholarship from leading figures in the field, discussing issues relating to sound and listening from the broadest set of interdisciplinary perspectives. Inspiring students and researchers

attentive to sound in their work, newly-commissioned and classical excerpts bring urban research and ethnography alive with sensory case studies that open up a world beyond the visual. This book is core reading for all courses that cover the role of sound in culture, within sound studies, anthropology, sociology, cultural studies, history, media studies and urban geography. *The Dead of the Irish Revolution* Dec 31 2020 The first comprehensive account to record and analyze all deaths arising from the Irish revolution between 1916 and 1921 "A monumental new

book [and] an incredible piece of research. . . . Formidable, authoritative and handsomely produced, *The Dead of the Irish Revolution* is a fitting memorial."-- Andrew Lynch, *Irish Independent* "Will surely serve as the indispensable reference work on this topic for the foreseeable future. . . . A truly remarkable feat of close scholarship and calm exposition."-- Gearoid O Tuathaigh, *Irish Times Weekend* This account covers the turbulent period from the 1916 Rising to the Anglo-Irish Treaty of December 1921--a period which saw the achievement of

independence for most of nationalist Ireland and the establishment of Northern Ireland as a self-governing province of the United Kingdom. Separatists fought for independence against government forces and, in North East Ulster, armed loyalists. Civilians suffered violence from all combatants, sometimes as collateral damage, often as targets. Eunan O'Halpin and Daithí Ó Corráin catalogue and analyze the deaths of all men, women, and children who died during the revolutionary years--505 in 1916; 2,344 between 1917 and 1921. This study provides a unique and comprehensive picture of everyone

who died: in what manner, by whose hands, and why. Through their stories we obtain original insight into the Irish revolution itself.

Imaginations of Migration Jul 18

2022 How do Mexican migrants in Germany perceive themselves and their lives? Innovatively combining theories of interculturality and social imaginaries, Yolanda López García uses the anthropological method of life stories to investigate the understudied area of Mexican migration to Germany. She discusses areas such as quality of life as a motivation

for migration, the role of banal nationalism in imaginaries, the dynamic subjective re-construction of Mexicanness, and the process of (imagined) »Germanisation«.

Yolanda López García ultimately argues that individuals, as social agents, engage with and construct new emerging imaginaries, which may be viewed as important engines of social change.

Birds of the Horn of Africa May 24 2020 The Horn of Africa has the highest endemism of any region in

Africa, and around 70 species are found nowhere else in the world. Many of these are confined to the isolated highlands of Ethiopia and Eritrea, but a large number of larks specialise in the arid parts of Somalia and adjoining eastern Ethiopia, whilst the island of Socotra has its own suite of endemic species. The region is also an important migration route and wintering site for many Palearctic birds. This is the first field guide to the birds of this fascinating region, and a companion to *Birds of East Africa* by two of the same authors. Over 200 magnificent plates by John Gale and Brian Small

illustrate every species that has ever occurred in the five countries covered by the guide, and the succinct text covers the key identification criteria. Special attention is paid to the voices of the species, and over 1000 up-to-date colour distribution maps are included. This long-awaited guide is a much-needed addition to the literature on African birds and an essential companion for birders visiting the region.

Ghostly Encounters Sep 08 2021 Mumbled voices in an empty attic, heavy

footsteps on the stairs when all in the house are asleep, darting shadows across a darkened room . . . It should come as no surprise that with the dawn of the digital age, people have turned their new technology toward the mysterious stories they've heard or events they've personally experienced. Here, in the dusky gloom where traditional science has refused to enter, a new breed of investigator has introduced us to the strange sounds and weird images from these nocturnal adventures. Like most people, Jeff Cole has always been intrigued by aspects of the paranormal—does

the human spirit endure after the body dies, and are there such things as ghosts? Though the deeper questions are best left to priests and scholars, his investigations of well- and lesser-known historical sites indicate the existence of a truly inexplicable phenomenon. *Ghostly Encounters* chronicles Cole's journey into the world of ghost hunting, other ghost hunting groups he has met, and the team he ultimately joins. *Ghostly Encounters* also provides a first-person account of the haunted locations explored, historical background and context to these sites, and audio and

video clips so the reader can experience some of the startling evidence captured during these investigations.

Conscience in Recovery from Alcohol Addiction Aug 07 2021

Academic research

in alcohol addiction presents diverse results and subject inadequacies. This study identifies conscience and its influence through spirituality on successful recovery as promoting unity and adequacy in the field. The purpose of the study is to analyze the relationship between conscience, spirituality, and recovery from alcohol addiction. This threefold framework underlines the conceptual importance of cognition, affect, behavior, spirituality, and character in addiction studies. Narrative analysis (NA) is employed for designing the present research. It

is utilized for collection, examination, and formulation of the results derived from the participants' stories. Semi-structured interviews are used within the NA framework to provide the data from the twelve participants. The latter are selected as a homogeneous group based on characteristics of their addiction, spirituality, and recovery. The analysis of narratives defines conscience with its cognitive, emotive, and conative elements as related to spirituality. The conscience's nature and functioning undergo deterioration during addiction

and complete rejuvenation through participants' spiritual transformation of a transcendent divine experience. Spiritually empowered conscience supports progressive recovery from alcohol addiction. The conscientious approach to self, life, and others is shaped by virtue and spiritual commitment. English

Pronunciation in L2

Instruction Jan 12

2022 This book

provides an overview of pronunciation teaching and learning practices in secondary schools, providing insights into secondary school learners' needs,

expectations and motivation regarding the importance of learning English and particularly English pronunciation. It presents a summary of the research on L2 pronunciation acquisition, teaching techniques and factors affecting the learning process as well as the results and conclusions of a longitudinal study conducted in a Polish secondary school. The study indicates that learners consider pronunciation a crucial component of English learning and a predictor of successful communication. Moreover, it shows that accuracy is highly valued by learners, and that

systematic and regular pronunciation instruction, even if devoted mainly to segments, has the potential to contribute to the overall improvement in learners' communicative competence and their confidence as speakers and users of English. The book is based on the first-hand experience of a teacher-researcher.

The Nature and Origin of Granite

Sep 27 2020 The origin of granite has for long fascinated geologists though serious debate on the topic may be said to date from a famous meeting of the Geological Society of France in 1847. My own introduction to the subject began exactly one hundred years later when, in an interview with Profes sor H. H. Read, I entered his study as an amateur fossil collector and left it as a committed granite petrologist -

after just ten minutes! I can hardly aspire to convert my reader in so dramatic a way, yet this book is an attempt, however inadequate, to pass on the enthusiasm that I inherited, and which has been reinforced by innumerable discussions on the outcrop with granitologists of many nationalities and of many shades of opinion. Since the 1960s, interest in granites has been greatly stimulated by the thesis that granites image their source rocks in the inaccessible deep crust, and that their diversity is the result of varying global tectonic context. So great a body of new data

and new ideas has accumulated that my attempt to review the whole field of granite studies must carry with it a possible charge of arrogance, especially as I have adopted the teaching device of presenting the material from a personal point of view with its thinly disguised prejudices.
