The New Parkinson's Treatment Sep 20 2022 This revised edition of The New Parkinson's Treatment: Exercise is Medicine is a must read if you, or someone you know, has been diagnosed with Parkinson's. Exercise cannot be underestimated for its role in slowing Parkinson's down. This book introduces the seven key concepts to help you get the most out of your exercise program, as well as easy strategies and hints to keep you motivated. Based on cutting-edge research and tested extensively by Australian physiotherapists, this exercise program has been designed to bring out your inner warrior - your PD Warrior! The PD Warrior Philosophy is that exercise, education, community and a life-long commitment to fighting the symptoms of Parkinson's can help you develop a greater state of physical, mental and social wellbeing. Neurologists and other health professionals are referring to PD Warrior as a game-changer and, since its launch in Australia in 2012, it has grown exponentially, with extremely successful outcomes and widespread popularity. PD Warrior is not a cure, it's your chance to take control. So start now - you have nothing to lose and everything to gain.

Neuropolitique Mar 22 2020 The first version of Neuropolitique was written between 1973-1976 when Dr Leary was in prison. Indeed, several chapters were composed during solitary confinement. Dated? Of course not; this is Timothy Leary! Dr Leary explores the role of the dissident/philosopher and offers a multitude of brilliant observations on our past, present and, especially, our future. One of his best. Updated and rewritten.

Titles & Emoluments in Safavid Iran Apr 03 2021 Titles and Emoluments in Safavid Iran: A Third Manual of Safavid Administration contains unique and important information on offices, ethnic attitudes and administrative developments in Iran's Safavid government (1495-1720). It provides the official honorific title for each official (and the variations thereof), which shows the importance of these titles in the intricate structure of social and political standing among the power elite. The commentary's long database of all known administrative jurisdictions with names and dates of each of its governors gives us a more nuanced understanding of how the Safavid administration functioned, not only at the central level but also at the provincial one. This, together with a detailed index, allows the reader to find the names of individual governors and follow their careers. This book facilitates the analysis of power relations between the central and tribal interests as well as other groups, and the changes therein over time. It is an essential historical resource for all those interested in Iran's Safavid era.

Reform and Reconstruction of the Security Sector Feb 13 2022 "Security sector reform (SSR) is widely recognised as key to conflict prevention, peace-building, sustainable development and democratisation. SSR has gained most practical relevance in the context of post-conflict reconstruction of so-called failed states' and states emerging from violent internal or inter-state conflict. As this volume shows, almost all states need to reform their security sectors to a greater or lesser extent, according to the specific security, political and socio-economic contexts, as well as in response to the new security challenges resulting from globalisation and post-9/11 developments. Contributions from academics and practitioners elaborate on both the conceptual underpinnings and the practical realities of security sector reform and - a crucial aspect of post-conflict peace-building - security sector reconstruction. Leicester and the Court May 24 2020 During the past 25 years Elizabethan history has been transformed by the work of Simon Adams. Famous for the depth and breadth of his research in libraries and archives throughout Britain, Western Europe and the USA, he has brought to life the most enigmatic of the greater Elizabethans: Robert Dudley, Earl of Leicester. Together with his edition of Leicester's accounts and his reconstruction of Leicester's papers, Adams has published numerous essays and articles on Leicester's influence and activities. They have reshaped our knowledge of Elizabeth and her Court, Parliament, the localities from Wales to Warwickshire and such subjects of recent debate as the power of the nobility and the noble affinity, the politics of faction and the role of patronage.

Training Cognition Mar 26 2023 Training is both a teaching and a learning experience, and just about everyone has had that experience. Training involves acquiring knowledge and skills. This newly acquired training information is meant to be applicable to specific activities, tasks, and jobs. In modern times, where jobs are increasingly more complex, training workers to perform successfully is of more importance than ever. The range of contexts in which training is required includes industrial, corporate, military, artistic, and sporting, at all levels from assembly line to executive function. The required training can take place in a variety of ways and settings, including the classroom, the laboratory, the studio, the playing field, and the work environment itself. The general goal of this book is to describe the current state of research on training using cognitive psychology to build a complete empirical and theoretical picture of the training process. The book focuses on training cognition, as opposed to physical or fitness training. It attempts to show how to optimize training efficiency, durability, and generalizability. The book includes a review of relevant cognitive psychological literature, a summary of recent laboratory experiments, a presentation of original theoretical ideas, and a discussion of possible applications to real-world training settings.

Bastard Feudalism Dec 11 2021 "'Bastard Feudalism' is the term historians give to the tie that bound late medieval retainers to their lords, and allowed those lords in turn to wield the political power, and cut the figure, appropriate to their rank. Without it, the late medieval aristocracy would not have been able to rule their localities, and fight the wars (at home as well as abroad) that were such a prominent feature of the fourteenth and fifteenth centuries. It is thus of fundamental importance to our understanding of the late medieval world - its warfare, local government, justice and public order, as well as its politics and social structure. But bastard feudalism had a longer-term significance, too: by involving payment (rather than the grant of land) in return for service, it contributed to the increasing mobility of society that marks the transition to the early modern world." "This major work now offers the most radical reinterpretation of the subject for fifty years, transforming our understanding of it and setting a fresh agenda for future work in the field. Michael Hicks argues that bastard feudalism started far earlier and lasted far longer than scholars have traditionally allowed; and that it was far more complex - and often much more positive - in its effects than its conventional image as a source of instability and abuse." "Traditionally the concept has been linked almost exclusively to the non-resident gentry of 1300-1500 (the so-called indentured retainers). This book by contrast deals with the period from 1150 to 1650, and reveals more continuity than change over the five centuries it spans. It demonstrates that the most important retainers throughout the period were in fact the members of the lord's own household and the tenants of his estates, men whose bonds with their lord were particularly strong and enduring. Indentured retainers were unusual, and had all but disappeared by 1470." "Because these ties were stable, Professor Hicks argues, society founded on them was also predominantly stable. While bastard feudalism could be used to pervert justice and promote violence and civil war, he shows that its prime functions were peaceful and ceremonial, and that it normally operated within the law and was increasingly regulated by it."--BOOK JACKET.Title Summary field provided by Blackwell North America, Inc. John of Gaunt Sep 27 2020 John of Gaunt (1340-99) was the richest and most powerful subject in England, and a key actor on the international stage. He was deeply involved in the peasants' Revolt and the Hundred Years War. He was also one of the most hated men of his time. This splendid study, the first since 1904, vividly portrays the political life of the age, with the controversial figure of Gaunt at the heart of it.

Organizational Behavior in Sport Management Oct 21 2022 This textbook presents a comprehensive analysis of organizational behavior in sport organizations from a practitioner's perspective. It covers issues related to managing employees and work teams as well as organizational structure and culture in sport. The book has four sections: Organizational Behavior in the Sports Industry, Getting to Know Employees and Volunteers of Sport Organizations, Work Groups and Teams, and Understanding the Organization. Each chapter begins with a practitioner interview describing a challenge that was overcome by their organization. That example is used to highlight applicable theories and interventions used in the industry. Additional examples or theories are discussed to provide students a broad picture of managerial issues in the sports industry and provide alternative approaches to intervention illustrated in the practitioner interview. The case studies offer the opportunity to practice and apply the ideas to real-world scenarios in the sports industry. Students using this book will gain an understanding of how managers and leaders apply theory to communicate with and engage employees to foster desired organizational cultures while being challenged to address common issues using cases and hypothetical situations.

Robots, Healthcare, and the Law Jan 24 2023 The integration of robotic systems and artificial intelligence into healthcare settings is accelerating. As these technological developments interact socially with children, the elderly, or the disabled, they may raise concerns besides mere physical safety; concerns that include data protection, inappropriate use of emotions, invasion of privacy, autonomy suppression, decrease in human interaction, and cognitive safety. Given the novelty of these technologies and the uncertainties surrounding the impact of care automation, it is unclear how the law should respond. This book investigates the legal and regulatory implications of the growing use of personal care robots for healthcare purposes. It explores the interplay between various aspects of the law, including safety, data protection, responsibility, transparency, autonomy, and dignity; and it examines different robotic and AI systems, such as social therapy robots, physical assistant robots for rehabilitation, and wheeled passenger carriers. Highlighting specific problems and challenges in regulating complex cyber-physical systems in concrete healthcare applications, it critically assesses the adequacy of current industry standards and emerging regulatory initiatives for robots and AI. After analyzing the potential legal and ethical issues associated with personal care robots, it concludes that the primarily principle-based approach of recent law and robotics studies is too abstract to be as effective as required by the personal care context. Instead, it recommends bridging the gap between general legal principles and their applicability in concrete robotic and AI technologies with a risk-based approach using impact assessments. As the first book to compile both legal and regulatory aspects of personal care robots, this book will be a valuable addition to the literature on robotics, artificial intelligence, human-robot interaction, law, and philosophy of technology.

Security Governance in Post-conflict Peacebuilding Mar 14 2022 Post-conflict peacebuilding has become a primary concern of international politics. Indeed, the UN reform agenda, including the creation of a peacebuilding commission, makes clear that more must be done to prevent societies from falling back into violent struggle. Building up domestic capacity to provide security in an accountable manner plays a crucial role in this context. Applying a security governance perspective, this volume examines a number of key issues that must be addressed by both post-conflict societies and the international community as they confront the task of rebuilding after armed conflict. This includes security sector reform (SSR), disarmament, demobilization and reintegration (DDR), rule of law and transitional justice. Alan Bryden is deputy head of research at the Geneva Centre for the Democratic Control of Armed Forces (Switzerland). Heiner Hnggi is assistant director and head of research at the Geneva Centre for the Democratic Control of Armed Forces.

Weight Lifting Is a Waste of Time: So Is Cardio, and There's a Better Way to Have the Body You

Want Aug 19 2022 You've been lifting for a few years. When you take your shirt off, do you look like a professional athlete? Do you even look like you work out? Many fitness "experts" defend weights and cardio like they are infallible, but where are the results? Why does almost nobody look even marginally athletic? Fitness may be the most failed human endeavor, and you are about to see how exercise science has missed some obvious principles that when enacted will turn you into the superhuman you always wanted to be. In *Weight Lifting is a Waste of Time*, Dr. John Jaquish and Henry Alkire explore the science that supports this argument and lay out a superior strength training approach that has been seen to put 20 pounds of muscle on drug-free, experienced lifters (i.e., not beginners) in six months.

Gang Transitions and Transformations in an International Context Jul 26 2020 This unique volume explores why and how youth join and leave gangs, as a lens for exploring intervention and prevention through comparative, international research. The book explores three key questions: how do youth gangs form and how do they change over time? Why do youth join street gangs, and why do they leave? How can we use this knowledge to foster more effective interventions for gang problems? Drawing from research conducted in ten different countries (Belgium, Canada, Germany, Israel, the Netherlands, Norway, Sweden, the United Kingdom, the United States of America, and Venezuela) and a variety of disciplines, sixteen original chapters provide unique insights into: 1) patterns of gang participation and how it impacts individual behavior 2) individual transitions and their impact on gang transformations 3) fostering gang transition and transformation. This work will be of interest to researchers in Criminology and Criminal Justice, particularly with an interest in youth gangs, developmental and life-course criminology, criminal careers, and criminal networks, as well as related fields such as sociology, psychology, and comparative law, and public health.

The Man Who Saved Kabuki Sep 08 2021 As part of its program to promote democracy in Japan after World War II, the American Occupation, headed by General Douglas MacArthur, undertook to enforce rigid censorship policies aimed at eliminating all traces of feudal thought in media and entertainment, including kabuki. Faubion Bowers (1917-1999), who served as personal aide and interpreter to MacArthur during the Occupation, was appalled by the censorship policies and anticipated the extinction of a great theatrical art. He used his position in the Occupation administration and his knowledge of Japanese theatre in his tireless campaign to save kabuki. Largely through Bowers's efforts, censorship of kabuki had for the most part been eliminated by the time he left Japan in 1948. Although Bowers is at the center of the story, this lively and skillfully adapted translation from the original Japanese treats a critical period in the long history of kabuki as it was affected by a single individual who had a commanding influence over it. It offers fascinating and little-known details about Occupation censorship politics and kabuki performance while providing yet another perspective on the history of an enduring Japanese art form. Read Bowers' impressions of Gen. MacArthur on the Japanese-American Veterans' Association website.

Friendship and Love in the Middle English Metrical Romances Feb 19 2020 -Friendship and Love in the Middle English Metrical Romances- groups together a representative cross-section of the genre, according to variants of love relationships, and to ideas of friendship. The horizontal and the vertical structure of the relationship are tripartite. The horizontal stages are attraction, separation-testing-trial, and reunion, the vertical spheres are the personal, social/political, and religious. All relationships fall into two types, the restorative-concordant and the innovative-discordant. These are defined by the relative position of the partners in the social-political sphere of their relationship. The groups of relationship are defined by the initially more active partner: forward heroine, fairy mistress, forward hero, mutual love, married love; friendship, lords and retainers. Surveys of the Insular understanding of courtly love, and of Caxton's prose romances, complement the findings."

Richard III and Buckingham's Rebellion Dec 31 2020 "Through analysis of a cross-section of the rebels, the author demonstrates in vivid detail the connections between the leading southern gentry, their collective involvement in local government and their links with the court of Edward IV. Continuity of service under the new regime is set alongside the conspiracies and rebellion of 1483, providing the context for a detailed examination of Richard's response to the rising and the political dislocation it created. The study of the rebellion serves also as a fascinating expose of power relationships, patronage and cronyism in Ricardian England."--BOOK JACKET.

The Third Claw of God Nov 29 2020 Andrea Cort became a "war criminal" at the age of eight when an unexplained darkness invaded her soul. Now, decades later, the Devil is calling her. Employed by the Diplomatic Corps but secretly aiding the AI masters of the universe, Counselor Andrea Cort despises the powerful Bettelhines—unrepentant death merchants who have prospered from the

annihilation of civilizations. Now curiosity compels her to answer a cryptic summons to their home world, where the only law is Bettelhine law. But a murder attempt greets her arrival at Xana's orbital entry port—and far graver peril awaits aboard the elevator transport meant to carry Andrea to the planet's surface. Trapped miles above Xana—surrounded by suspicious Bettelhines, their slavishly loyal retainers . . . and a corpse liquefied by a 15,000-year-old weapon—Andrea must unmask an assassin or die an equally hideous death. But the true reason for her summons—and sordid secrets weaving through her own dark past—threaten to destroy Andrea Cort more completely than the Claw of God.
