Tens of thousands of mechanical engineers are engaged in the design, building, upgrading, and optimization of various material handling facilities. The peculiarity of material handling is that there are numerous technical solutions to any problem. The engineer's personal selection of the optimal solution is as critical as the technical component. Michael Rivkin, Ph.D., draws on his decades of experience in design, construction, upgrading, optimization, troubleshooting, and maintenance throughout the world, to highlight topics such as: • physical principles of various material handling systems; • considerations in selecting technically efficient and environmentally friendly equipment; • best practices in upgrading and optimizing existing bulk material handling facilities; • strategies to select proper equipment in the early phases of a new project. Filled with graphs, charts, and case studies, the book also includes bulleted summaries to help mechanical engineers without a special background in material handling find optimal solutions to everyday problems. Christian theology needs to be reconstructed in light of recent and momentous intellectual changes, social revolutions, and steep pedagogical challenges. That is the conviction of many of North America's leading theologians whose close collaboration over several years bring us this exciting volume. Reconstructing Christian Theology introduces theology in such a way that readers can discern the relevance of historical materials, pose theological questions, and begin to think theologically for themselves. Further, like other projects of the Workgroup on Constructive Theology, this volume stems from a deep desire to model a credible, creative, and engaged contemporary theology. So each chapter tackles major Christian teaching, juxtaposes it with a significant social or cultural challenge, and then reconstructs each in light of the other. The result is an innovative and compelling way to learn how theology can contribute to rethinking the most pressing issues of our day.
