the tools to respond appropriately. In a gripping story of international power and deception, Jeffrey Engel reveals the “special relationship” between the United States and Great Britain in a new and far more competitive light. As allies, they fought communism. As rivals, they locked horns over which would lead the Cold War fight. In the quest for sovereignty and hegemony, one important key was airpower, which created jobs, forged ties with the developing world, and, perhaps most importantly in a nuclear world, ensured military superiority. Only the United States and Britain were capable of supplying the post-war world’s ravenous appetite for aircraft. The Americans hoped to use this dominance as a bludgeon not only against the Soviets and Chinese, but also against any ally that deviated from Washington’s rigid brand of anticommunism. Eager to repair an economy shattered by war and never as committed to unflinching anticommunism as their American allies, the British hoped to sell planes even beyond the Iron Curtain, reaping profits, improving East-West relations, and garnering the strength to withstand American hegemony. Engel traces the bitter fights between these intimate allies from Europe to Latin America to Asia as each sought control over the sale of aircraft and technology throughout the world. The Anglo–American competition for aviation supremacy affected the global balance of power and the fates of developing nations such as India, Pakistan, and China. But without aviation, Engel argues, Britain would never have had the strength to function as a brake upon American power, the way trusted allies should. Examines the 1984 "war" that pitted Pratt and Whitney against GE in head-to-head competition for multi billion dollar defense contracts to provide high performance engines for front line fighter aircraft. Controlling Accounts.--The addition of special columns in books of original entry makes possible the keeping of Controlling Accounts. The most common examples of such accounts are Accounts Receivable account and Accounts Payable account. These summary accounts, respectively, displace individual customers' and creditors' accounts in the Ledger. The customers' accounts are then segregated in another book called the Sales Ledger or Customers' Ledger, while the creditors' accounts are kept in the Purchase or Creditors' Ledger. The original Ledger, now much reduced in size, is called the General Ledger. The Trial Balance now refers to the accounts in the General Ledger. It is evident that the task of taking a Trial Balance is greatly simplified because so many fewer accounts are involved. A Schedule of Accounts Receivable is then prepared, consisting of the balances found in the Sales Ledger, and its total must agree with the balance of the Accounts Receivable account shown in the Trial Balance. A similar Schedule of Accounts Payable, made up of all the balances in the Purchase Ledger, is prepared, and it must agree with the balance of the Accounts Payable account of the General Ledger." The Balance Sheet.--In the more elementary part of the text, the student learned how to prepare a Statement of Assets and Liabilities for the purpose of disclosing the net capital of an enterprise. In the present chapter he was shown how to prepare a similar statement, the Balance Sheet. For all practical...
